LISTA's National Latino Alliance on Health Information Technology cordially invites you to attend an informative training on EHR adoption and lessons learned that will give you insight on the endless opportunities upcoming in Health Information Technology. Attending this event will be primary care physicians, Federally Qualified Health Centers and technology professionals to speak on the value of EHR adoption and how it will improve health care management, as well as give greater support and empowerment to the primary care physician in the Latino community and communities of color.

HIT will improve health and health care delivery for the Latino community and those who care for them, we believe that through the engagement of the Latino healthcare and information technology stakeholder in a discussion of the most economical roadmap to meaningful use would increase the rate of adoption. Here you will receive valuable tools, information and resources needed to make your adoption a success and take advantage of career opportunities.
